Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Species I with claims 1, 5-12, 14, 19-21, 30, 34-36 in Paper No. 6 is acknowledged.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "two boundaries is coated or treated for reflection enhancement" in claim 12 and the "two boundaries is a coated surface" in claim 21 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5, 10-12, 14, 19-21, 30 and 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenmochi [US 5,128,842].

Regarding claims 1, 14 and 30, Kenmochi discloses an illumination system having a display [5], a plurality of keys [3], a light source [4], a light conduit [1], a light guiding section [1a, 1b] with internal reflection and a plurality of light escape elements [2] for illuminating the keys [3] (figures 1, 2 and 4, column 1 lines 5-10, column 2 lines 63-68, column 3 lines 1-13).

Regarding claim 5, Kenmochi discloses a LED [4] (column 4 lines 16).

Regarding claims 10, 11, 19 and 20, Kenmochi discloses two parallel dense-rare boundaries [1a, 1b] (figure 1).

Regarding claims 12 and 21, Kenmochi discloses at least one of the two boundaries being treated or coated [6] for reflection enhancement (figures 5-6, column 3 lines 40-55, column 4 lines 64-65).

Regarding claim 34-36, Kenmochi discloses an electronic mobile telephone (column 1 lines 5-10).

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenmochi as applied to claim 1 above, and further in view of Parker et al. [US 6,367,940].

Regarding claims 6-9, Kenmochi discloses a LED [4], but Kenmochi does not disclose the light source comprising the laser diode, the optical fiber, the incandescent lamp and the fluorescent lamp.

Parker et al. teach the use of a laser diode, the optical fiber, the incandescent lamp and the fluorescent lamp for illumination a key (figure 7, abstract, column 5 lines 11-20, column 9 lines 63-67).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to replace the LED by the laser diode, the optical fiber, the incandescent lamp and the fluorescent lamp as taught by Parker et al. for purpose of providing a better light emitter or a good laser-light emitter.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Q. Truong whose telephone number is (703) 308-6452. The examiner can normally be reached on Monday-Friday (8:00 AM - 4:00 PM).
